2022 FALL SYMPOSIUM CE EVENT

OCTOBER 29, 2022 | ONSITE & LIVE WEBINAR | UP TO 8 HOURS CEU

Learning Objectives

TRACK 1: YEAR IN REVIEW: SMALL ANIMAL TRACK	TRACK 2: TECHNICIAN TRACK	TRACK 3: EQUINE TRACK 
<p>Neurology Marguerite Knipe, DVM, DACVIM (Neurology)</p> <ol style="list-style-type: none"> Review current literature in veterinary neurology Discuss advances in diagnostics or therapeutics Discuss strengths and weaknesses of current research 	<p>Anesthesia Machine Set Up, Use & Troubleshooting Richard McAndrew</p> <ol style="list-style-type: none"> Learn the components of an anesthesia machine and their function Recognize and prevent potential hazards in the anesthesia machine Develop an understanding of how to maintain and repair your anesthesia machine 	<p>What's All the Fuzz About EHV-1? Nicola Pusterla, DVM, PhD, DACVIM, AVDC-Equine</p> <ol style="list-style-type: none"> Review selected aspects of EHV-1 as it pertains to equine herpesvirus myeloencephalopathy (etiology, genotype, clinical presentation, diagnosis, treatment and prevention). Cover new information on recent EHM outbreaks in CA Review research data regarding frequency of EHV-1 detection in healthy sport horses and environmental monitoring
<p>Orthopedic Surgery Barbro Filliquist, DVM, MAS, DACVS-SA, DECVS</p> <ol style="list-style-type: none"> Describe known associations with feline degenerative joint disease Appraise current treatment options for feline degenerative joint disease Describe the benefit of using Feline Musculoskeletal Pain Index (FMPI) 	<p>Ventilator Set Up, Use & Troubleshooting Richard McAndrew</p> <ol style="list-style-type: none"> Understand the role of a ventilator Gain familiarity with the set-up of various ventilators Recognize and respond to issues with your ventilator and its interaction with the patient and the anesthesia machine 	<p>CoVs of Equids (SARS-CoV-2 and ECoV) Nicola Pusterla, DVM, PhD, DACVIM, AVDC-Equine</p> <ol style="list-style-type: none"> Review coronavirus infections of equids and their susceptibility to SARS-CoV-2 Discuss new seroepidemiological data on SARS-CoV-2 in equids Review and discuss the well-established ECoV and its clinical and diagnostic challenges
<p>Endocrinology Ann Della Maggiore, DVM, DACVIM</p> <ol style="list-style-type: none"> Evaluate recent literature that changes clinical treatment and monitoring of diabetes dogs and cats Review specifics of study design and results of these studies/journal articles Discuss clinical relevance and specifics to how these studies change clinical practice 	<p>Ventilator Lab Richard McAndrew</p> <ol style="list-style-type: none"> Develop a familiarity with setting up a ventilator Comprehend how to adjust individual ventilator settings React to different scenarios presented with a ventilator 	<p>Beyond Teeth Floating: Other Dental Procedures for Equine Practitioners Nicola Pusterla, DVM, PhD, DACVIM, AVDC-Equine</p> <ol style="list-style-type: none"> Review how all good dental procedures always start with a comprehensive oral examination and dental radiographs Discuss how various minor procedures are not performed because of lack of instrumentation or technical skills Overview on selected and practical dental procedures such as nerve blocks, incisor/cheek teeth extractions and sinus access

2022 FALL SYMPOSIUM CE EVENT

OCTOBER 29, 2022 | ONSITE & LIVE WEBINAR | UP TO 8 HOURS CEU

<p>Cardiology Allison Gagnon, MS, DVM, DACVIM (Cardiology)</p> <ol style="list-style-type: none"> 1. Discuss the use of antithrombotics in cats at risk of ATE 2. Discuss the effects of diet change in dogs with dilated cardiomyopathy 3. Review treatment and prognosis of infective endocarditis in dogs 4. Discuss a new treatment option for ventricular arrhythmias in boxers. 		<p>Dealing with Scratches/Grease Heel/Pastern Dermatitis Stephen White, DVM, DACVD</p> <ol style="list-style-type: none"> 1. To recognize the most common presentations of pastern skin disease 2. To become familiar with a step-wise approach to both diagnostic procedures and treatments 3. To understand the reasons for the various treatments and their pros and cons, especially in explanations to owners
<p>KEYNOTE SESSION TRACK</p> <p>Short Legs and Jumping Genes- What Does It All Mean? Danika Bannasch, DVM, PhD</p> <ol style="list-style-type: none"> 1. Identify what retrogenes are, how they form and how they can effect significant change 2. Describe how retrogenes can cause diseases and the differences between species 3. Examine some examples of retrogenes serving important biological functions 		
<p>TRACK 1: SMALL ANIMAL DERMATOLOGY</p>		<p>TRACK 2: TECHNICIAN TRACK</p>
<p>A Practical Approach to the Pruritic Dog Stephen White, DVM, DACVD</p> <ol style="list-style-type: none"> 1. To recognize the common and uncommon causes of pruritus in the dog 2. To be able to rule in or out secondary infections that contribute to pruritus in the dog 3. To become familiar with various anti-pruritic medications, their pros and cons, and when to use them 	<p>Vaccinology: How when and why we give them Holly Cummings, LVT</p> <ol style="list-style-type: none"> 1. Review disease agents for canine infectious respiratory disease complex (CIRDC), leptospirosis, and Lyme disease 2. Understand the importance of investigating patient history 3. Develop effective tools for client communication, including tips for recommending lifestyle vaccines
