

SMALL ANIMAL MEDICINE MINI BOOT CAMP SERIES: CANINE EPILEPSY

SATURDAY, DECEMBER 11, 2021 | VIRTUAL | UP TO 3 HOURS CEU

SATURDAY, DECEMBER 11, 2021

8:30 am – 8:40 am	WELCOME + ANNOUNCEMENTS <i>Jodi Westropp, DVM, PhD, DACVIM</i>
8:40 am – 11:30 am	CANINE EPILEPSY Peter Dickinson, BVSc, PhD, DACVIM (Neurology) & Holger Volk, DVM, PhD, PGCAP, DipECVN

LEARNING OBJECTIVES:

Peter Dickinson, BVSc, PhD, DACVIM (Neurology)

1. Understand the basic classification of underlying causes for seizures and how it impacts case management at a practitioner level.
2. Recognize the common clinical case management mistakes that may result in poor seizure control.
3. Develop a global view of seizure control based on a few simple principles that can be applied in all cases and situations.

Holger Volk, DVM, PhD, PGCAP, DipECVN

4. To appreciate the importance of clearly defining the clinical problem to manage canine epilepsy and its comorbidities appropriately.
5. To appreciate the importance of comorbidities in canine epilepsy and their impact on quality of life of the pet and the owners.
6. To understand the pharmacology and clinical applications of antiseizure drugs used in veterinary practice.
